

Inventor's Workshop

Inventors make machines to make work easier. Before they could invent something, they had to notice that there was a problem or situation that needed to be made easier. Your assignment is to invent a compound machine, made of 2 or more simple machines that will make a task easier.

Your Compound Machine needs to have the following:

1. Name

2. Picture
 - Neat Drawing
 - Label Simple Machines
 - Color

3. Short Description
 - What problem does your Compound Machine solve?
 - How does it work?
